

Insulation mats

Mats are single-side stapled with galvanized wire to a galvanized netting 25 x 0,7. They may be produced as single-side lined with AluR-foil. TERVOL® TDM-100 is recommended for thermal, fire and acoustic insulation and protection of industrial plants, power plants and heating plants, while in the shipbuilding industry it is recommended for the insulation of ventilation canals, pipelines, store rooms and other thermo-technical plants and devices with limit application temperature of 660°C.

Product data

Thickness (mm)	Length (mm)	Width (mm)	Pc/Pack	m ² /pack
40	6000	500	1	3.00
50	5000	500	1	2.50
60	4000	500	1	2.00
70	4000	500	1	2.00
80	3000	500	1	1.50
90	3000	500	1	1.50
100	3000	500	1	1.50

Incombustibility class in accordance with HRN EN 13501-1: A1

Longitudinal resistance to air flow in accordance with HRN EN 29053: $r > 50 \text{ kNs/m}^2$

Water impermeability in accordance with EN 1609: $< 1 \text{ kg/m}^2$
